

Amendments to the Claims

Please amend claims 26-31, as indicated below:

Claims 1-25. Cancelled.

26. (currently amended) A medicament delivery device comprising:

a medicament reservoir;

an inhalation passage; and

a metering member, provided with at least one dispensing cup, adapted to transfer a measured dose of medicament from the medicament reservoir to a medicament delivery position ~~the inhalation passage~~;

wherein the metering member comprises a medicament dispensing member and a medicament measuring member associated therewith, said medicament dispensing member being provided with ~~provides~~ at least one measuring chamber for transferring medicament from the reservoir to the dispensing cup,

the arrangement being such that the metering member can be moved from a first position, in which medicament is transferred from the reservoir to the measuring chamber, to a second position, in which medicament is transferred from the measuring chamber to the dispensing cup, and to a third position in which medicament is delivered to the medicament delivery position; and

wherein the dispensing cup is provided with an air duct.

27. (currently amended) A medicament delivery device according to claim 1 ~~+~~ 26, characterized in that the device is provided with a moisture proof barrier.

28. (currently amended) The delivery device according to claim 1 ~~+~~ 26 or ~~2~~ 27 wherein said metering member comprises a moisture resistant sleeve.

29. (currently amended) The delivery device according to claim 3 ~~28~~ 28 wherein at least one aperture in said sleeve provides said at least one measuring chamber.

30. (currently amended) An inhaler comprising:

a medicament reservoir;

an inhalation passage ~~for the delivery of the medicament~~; and

a metering member, provided with at least one dispensing cup, adapted to transfer a measured dose of medicament from the medicament reservoir to a medicament delivery position;

wherein the metering member comprises a medicament dispensing member and a medicament measuring member associated therewith, said medicament dispensing member being provided with ~~provides~~ at least one measuring chamber for transferring medicament from the reservoir to said dispensing cup,

the arrangement being such that the metering member can be moved from a first position, in which medicament is transferred from the reservoir to the measuring chamber, to a second position, in which medicament is transferred from the measuring chamber to the dispensing cup, and to a third position which medicament is delivered to the medicament delivery position; and

wherein the dispensing cup is provided ~~with~~ a duct to allow air to be sucked through the metering member upon inhalation by a patient.

31. (currently amended) An inhaler according to claim 3 28 characterized in that the metering member comprises an outer sleeve and a dispensing member.
